

Service

Experience to get you on-line quickly and safely. From process control through the power house and out the stack, Forney Service is your solution.

Forney's factory trained technicians optimize your plant's profitability by providing safe and efficient management of all your service needs. Through our world-wide service network, Forney can customize solutions for a wide range of situations and offer these solutions on both Forney's and other suppliers' equipment.

Forney is committed to providing superior product and application support in addition to combustion start-up and commissioning services for electric utilities, industrial plants and institutional facilities.

DETECTOR, IGNITER & DUCT BURNER SERVICES

Forney began operations as a supplier of burner and safety monitoring equipment to electric utilities in 1927. We have expanded our services to cover all industrial and institutional applications over the years. Our service technicians provide new equipment, repairs, upgrades, retrofits and evaluations for burners, igniters, flame detectors / scanners, duct burners and associated equipment. Our services also include:

- Outage Support
- Engineering Support
- Optimization Programs
 - › Burner and Flame Detector/Scanner Tuning
 - › Burner Management System Outage Support
 - › Duct Burner

BMS & PROCESS CONTROL SERVICES

Forney's expertise in Burner Management Systems (BMS) and Process Controls is unparalleled. Let our service technicians apply this knowledge base to all your controls needs. We specialize in:

- PLC Logic Design Modifications and Troubleshooting - all major brands including Allen-Bradley, Siemens, GE, Modicon and all data highway communications
- NFPA Compliance Reviews and Upgrades
- Safety Controls for Unique Applications, such as Fire Safety Training, Operations Mock-ups, etc.
- Logic Design and Implementation for Manufacturing and Industrial Processes

For Service Support, Anytime - Anywhere.

PREVENTIVE MAINTENANCE & SERVICE CONTRACTS

Preventive Maintenance (PM) and Service Contracts can be customized to meet your needs.

Operations and service training can be provided on-site or at our factory. Services offered include:

- Annual igniter tuning
- Annual detector/scanner tuning
- Quarterly duct burner system inspections
- Customized training

SPARE PARTS ORGANIZATION

Our Aftermarket group is here to help you. Forney offers spare parts, replacement parts and upgrades for all Forney products and many of our competitors' products, including:

- Flame Detectors / Scanners
- Flame Amplifiers / Controllers
- Analyzers
- Oil and Gas Igniters
- HESIs / Pilots
- Filters
- Fans and Blower Parts
- Pressure / Flow Switches
- Pumps
- Valves and valve repair kits

Forney's Aftermarket group can also assist when you need existing equipment repaired, which is often more cost effective than replacement.

COMMITTED TO GETTING YOUR PLANT OR PROCESS UP AND RUNNING.

With over 100 sales representatives in over 50 countries around the world, Forney Corporation provides customers with immediate, experienced support for all Forney products. This local presence plays a key role in delivering prompt service to maximize product performance.
